## Mirror Play

Why not ask about including some mirror play as part of your photoshoot?

Suitable for babies from the time that they're able to steadily lift their head and chest (usually around 5 months) up to approximately 18 months old.

The key to getting happy, smiley faces from little ones is keeping them entertained. Sometimes being asked to sit still in one place for their photoshoot is just too much!

The challenge for us is finding something that amuses them but also enhances your photographs rather than detracting from them . . . Mirrors tick all the boxes.

\*\*\* With safety in mind, all mirrors for these sessions are made from acrylic (plastic) panels NOT glass \*\*\*
